

Jorge Condor

PhD Candidate at USI, Switzerland

- October 10, 1998
- Spanish
- jorge.condor@usi.ch
- +41 078 224 70 97
- <https://arcanous98.github.io/>

Languages

- Spanish
- English
- Italian
- French

Hard Skills

- Programming Languages (C++, Python, MATLAB)
- Machine learning frameworks (PyTorch)
- Physically based rendering, differentiable rendering (Mitsuba 3, Optix)
- Computer Vision (OpenCV)

Soft Skills

- Great team working skills
- Great communication skills
- Hard worker and a team leader

Education

PhD

March 2022 – Present **PhD Student, IDSIA-USI** The Swiss AI Lab IDSIA-USI Lugano, Switzerland
PhD Student at USI Lugano, Switzerland under the supervision of Prof. Piotr Didyk. My research focuses on leveraging inverse graphics to improve applications in vision, real-time rendering and fabrication

Master

September 2020 – February 2022 **Master of Engineering in Robotics, Graphics and Computer Vision (English)** Universidad de Zaragoza
Took courses on Deep Learning, Computer Graphics, VR, Computer Vision, SLAM and Robotics. Obtained Honors in Modelling and Simulation of Appearance (PBR Computer Graphics course), where I developed a path tracer based on Nori and implemented features such as volumetric path tracing for both homogeneous and heterogeneous media and fur rendering. Got Honorable Mention (second prize) in the Rendering Contest judged by Marcos Fajardo, Matt Chiang and Wojciech Jarosz.

Master Thesis Graphics & Imaging Lab
Obtained Honors in my Master Thesis, working under the supervision of Prof. Adrián Jarabo on the topic of Neural Rendering of Complex Luminaires, successfully leveraging neural networks to significantly accelerate traditional rendering pipelines. Our results were published and presented at EGSR 2022.

Bachelor

September 2016 – July 2020 **Bachelor in Electronics and Automatic Control Engineering (Spanish)** Universidad de Zaragoza
Special interest in digital and analog electronics, robotics and machine learning. Class delegate for several years. Obtained Honors in Digital Electronics, Thermodynamics, Chemistry and Fundamentals of Electronics

Bachelor Thesis Optical Laser Technology Group, I3A
A Deep Learning approach for Simultaneous Localization and Classification of Microparticles from Digital Holograms. This technology can be used towards the development of new treatments for blood and respiratory diseases as well as cancer.

2019 – 2020 **Erasmus Programme in Aalto University, Finland**
Took Master-level courses in the fields of AI, electronics design and robotics.

Working Experience

June 2025 – Present **Research Scientist Intern** NVIDIA, Zurich, Switzerland
Working with the Spatial Intelligence Lab under Zan Gojcic on Neural Reconstruction and Rendering.

May 2024 – August 2024 **External Research Collaborator @ Meta** Nonstop Consulting (Remote)
Part-time role to continue my work alongside the Monaco rendering team at Meta, working on real-time physically based rendering.

September 2023 – January 2024 **Research Scientist Intern** Meta Reality Labs, Zurich, Switzerland
Worked with the Monaco rendering team on real-time solutions for Physically-based rendering of humans involving hardware-accelerated analytic ray tracing, Gaussian splatting and differentiable rendering, under the supervision of Christophe Hery and Adrián Jarabo

September 2022 – Present **Teaching Assistant, Computer Graphics and Image and Video Processing Courses** USI, Switzerland
Teaching assistant for the bachelor-level Computer Graphics course and the master-level Image and Video Processing course in USI. My duties include design of practical assignments, preparation of practical exercise lessons, grading of assignments and exams and attending students questions over theory or coding.

September 2021 – February 2022	Research Intern, Graphics and Imaging Lab Developed my Master Thesis within the group funded by a competitive scholarship, the results of which we published and presented in EGSR 2022.	Universidad de Zaragoza, Spain
February – June 2021	Research Intern, Graphics and Imaging Lab Developed a volume estimation module using single RGB images in the context of an image-based perceptual material appearance editing project, collaborating with Manuel Lagunas, Johanna Delanoy, Belén Masiá and Diego Gutiérrez. Our work was published at Computer Graphics Forum (Q1).	Universidad de Zaragoza, Spain
July 2017 – September 2019	Mathematics, Physics and Chemistry Tutor Mathematics, Physics and Chemistry tutor for baccalaureate (university entry exams preparation) students	Zaragoza, Spain

Publications

August 2025	<i>Human Vision Constrained Super-Resolution</i> Proc. of the Workshop on Human-Inspired Computer Vision (HiCV, ICCV Workshops'25). Volodymyr Karpenko, Taimoor Tariq, Jorge Condor, Piotr Didyk.	
July 2025	<i>Puzzle Similarity: A Perceptually-guided No-Reference Metric for Artifact Detection in 3D Scene Reconstructions</i> International Conference on Computer Vision (ICCV'25). Nicolai Hermann, Jorge Condor, Piotr Didyk.	
June 2025	<i>Temporal Brightness Management for Immersive Content</i> Eurographics Symposium on Rendering (EGSR'25). Luca Surace, Jorge Condor, Piotr Didyk.	
Dec 2024	<i>Don't Splat your Gaussians: Volumetric Ray-Traced Primitives for Modeling and Rendering Scattering and Emissive Media</i> ACM Transactions on Graphics (Presented at SIGGRAPH'25). Jorge Condor, Sebastien Speierers, Lukas Bode, Aljaz Bozic, Simon Green, Piotr Didyk, Adrian Jarabo.	
July 2023	<i>Gloss-aware Color Correction for 3D Printing</i> Proceedings of SIGGRAPH (SIGGRAPH'23). Jorge Condor, Michal Piovarci, Bernd Bickel, Piotr Didyk	
July 2022	<i>A Learned Radiance-Field Representation for Complex Luminaires</i> Eurographics Symposium of Rendering (EGSR'22). Jorge Condor, Adrián Jarabo	
January 2022	<i>A Generative Framework for Image-based Editing of Material Appearance using Perceptual Attributes</i> Computer Graphics Forum, presented at EuroGraphics 2022. Johanna Delanoy, Manuel Lagunas, Jorge Condor, Diego Gutiérrez, Belén Masiá	
October 2021	<i>Normal Map Estimation in the Wild</i> Poster at X Jornada Jóvenes Investigadores del I3A. Jorge Condor, Manuel Lagunas, Johanna Delanoy, Belén Masiá, Diego Gutiérrez	

Diplomas & Scholarships

Scholarships

2021	Beca TFM+Practicas Competitive scholarship awarding 600€/month to develop your master thesis within a research group	Zaragoza, Spain
2020	Strategic Master Scholarship Competitive scholarship awarding 4700€ to cover master studies	Zaragoza, Spain
2019	Santander Erasmus Scholarship Competitive scholarship awarding 500€ to cover Erasmus expenses	Zaragoza, Spain
2014	Aragonese Government Scholarship for a Linguistic Immersion in the English Language 1-month stay in Ontario, Canada, studying in the F.E. Madill School. Granted for excellent results in high school studies	Ontario, Canada

Jorge Condor

PhD Candidate at USI, Switzerland

Diplomas

2017	Driving Licence	Zaragoza, Spain
	B Licence	
2015	Cambridge English Level 2 Certificate in ESOL International (Advanced C1)	
	Overall score 199 (highest grading 202 in Speaking)	

Personal Interests

Nature & Photography Electronics	I love trekking and Nature in general, always taking my Nikon with me. Wildlife and travel photography are my personal favorites. I've done many projects throughout the years, including a 3D-printed, Raspberry-Pi based astrophotography camera, an Ambient light system for my monitor using arduino and building my own 3D-printer. Currently working on an auto-watering and plant health monitoring system.
Computer Hardware & Gaming	I've always been interested in computer hardware and PC building. When gaming, my games of choice are beautifully scored indies with a strong artistic direction, such as Gris, Transistor, Ori and the Blind Forest, Limbo, Pyre, Hades...
